

Name \_\_\_\_\_ *Economics*

Can you determine the text structure used? Read the paragraph below and highlight key words that help you determine text structure. Fill out the text structure and unfold your page to fill out the organizer.

- Possible Text Structures:
- \*Sequence
  - \*Compare and Contrast
  - \*Cause and Effect
  - \*Problem and Solution
  - \*Descriptive

Stores change what they sell and how much things cost based on what the consumer wants. This is called supply and demand. The supply is the product that can be purchased and the demand is how many people want the product. Since it is cold in the winter, the demand for swimsuits is low. This means that swimsuits will be cheaper in the winter. In the summer, however, a lot of people need swimsuits. This high demand causes swimsuits to cost full price. On a really hot day, ice cream will cost full price because lots of people want a cool treat. An ice cream store might have a sale on a cold day because the demand for ice cream will be lower.
